Cort McGinty

Designer

Experience

Numetric

Principle Designer

Sep 2017 - Present numetric.com

Arriving at Numetric, our focus on a general BI market required me to solve complex data management and chart building experiences for an ever-growing analytics platform. 8 months later we pivoted our focus to solutions for improving traffic safety. I've lead and helped grow the product team and currently lead all design efforts. I love being able to work on a product that has such direct impact on the safety and lives of others.

MX

Product Design Lead

Nov 2012 - Sep 2017

mx.com

First I was tasked with guiding clients on how to brand, market, and launch MX's financial management tool. I was an integral part of a complete rebrand from MoneyDesktop to MX. I later lead the Product Design team and focused much of my design efforts on MX's award-winning mobile app.

We're Official

Founder & Owner

Aug 2013 - Aug 2105 wereofficial.com In under a year and a half We're Official became a popular option for announcing a wedding. It offers products like wedding websites, printed announcements, and thank you cards as well as a free solution for couples to collect guest addresses. From design to development to

managing client and partner relationships, I've learned a lot about running a business.

Lifetime

Web Designer

Aug 2011 - Nov 2012 lifetime.com I started as a key role designing all the packaging and in store displays for many of Lifetime's products. My desire to get more into digital became a reality and I quickly became involved in their web presence. I was the sole designer responsible for a major redesign of a number of their websites including lifetime.com and the company intranet.
